In order to develop interest of our students, we adopt a practical approach rather than sticking to conventional books. Students of Grade VI observed the use of different lab apparatuses like measuring volume, through a lab practical session. Science is an ongoing process of observing. So we tried to give comprehensible insight to our learners of Grade VII and made their concepts of Microorganism and Microscope clearer. Functions of different parts of microscope were shown by the teacher and the students observed different slides under it.

Laboratory experience will develop and reinforce concepts further through following correct experimental procedures, observing, predicting, designing experiments, safely using equipment and writing up of laboratory reports.
